DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 14, 24, and 36-45, drawn to an interconnection structure containing a plurality of nodes, classified in class 370, subclass 254.
 - II. Claims 46-70, drawn to an interconnect structure comprising a plurality of node forms a ring network or hierarchy of levels, classified in class 370, subclass 404.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombinations I and II have separate utility as described above. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Claim Objections

3. Claims 1-7 and 39 are objected to because of the following informalities:

Claim 1, line 10, it is suggested to insert --the-- before “device set Z”.

Claim 39, line 2, “the logic L” lack antecedent basis. Claim 39 should be dependent on claim 37 for proper dependency.

Allowable Subject Matter

4. Claims 1-7 and 39 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.

5. Claims 14, 24, 36-38, and 40-45 are allowed.

Response to Arguments

6. Applicant's arguments filed 12/3/07 have been fully considered but they are not persuasive.

The applicant argued that the added claims relate to the invention of the canceled claims and should be entered. The examiner respectfully disagrees because the added claims are quite different from the canceled claims. In addition, the interconnect structures claimed in the added claims 46-70 are not related to the structures claimed in independent claims 1, 14, 24, 36, 40, and 42.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
